**LOT 30 - 1973-S Eisenhower Dollar PR67CAM Clad PCGS Certified**

**Description**

The 1973-S Eisenhower Dollar, with its proof mintage from the San Francisco Mint, represents a key example of the early U.S. clad coinage era, proudly showcased by Gilroy Roberts' striking obverse design. With a total production of 2,760,339 proof coins this year, the 1973-S belongs to a period of experimentation with non-precious metals, driven by economic shifts and the transition away from silver in U.S. currency. As a Proof 67 CAM, this coin has achieved a notable level in the PCGS population reports, exemplifying exceptional contrast between its mirrored fields and frosted devices. The careful craftsmanship of the proof striking process has left this piece with pristine surfaces, accentuating the detailed engraving of Ike's visage. For collectors focusing on completing the Eisenhower series or enhancing a registry set, this coin combines numismatic precision with historical significance, making it a valued addition to any collection.
