**LOT 9 - 1880 Morgan Silver Dollar**

**Description**

The 1880 Morgan Silver Dollar, struck at the Philadelphia Mint, boasts a mintage of 8,900,000, making it a common date within the series; however, this example stands out as an About Uncirculated piece, showcasing the artistry of George T. Morgan. The coin features the iconic Liberty head on the obverse and a majestic eagle on the reverse, symbolizing strength and freedom, and is a testament to the economic recovery following the Panic of 1873, which influenced silver coin production during this era. With its high-quality strike and brilliant luster, this specimen exhibits minimal wear, preserving the intricate details that collectors seek, including the cartwheel effect that enhances its visual appeal. As a staple for both type collectors and those completing Morgan Dollar sets, this coin represents a significant opportunity to acquire a well-preserved example from a beloved series that continues to captivate numismatists.
